

How do we kick our RT habit?

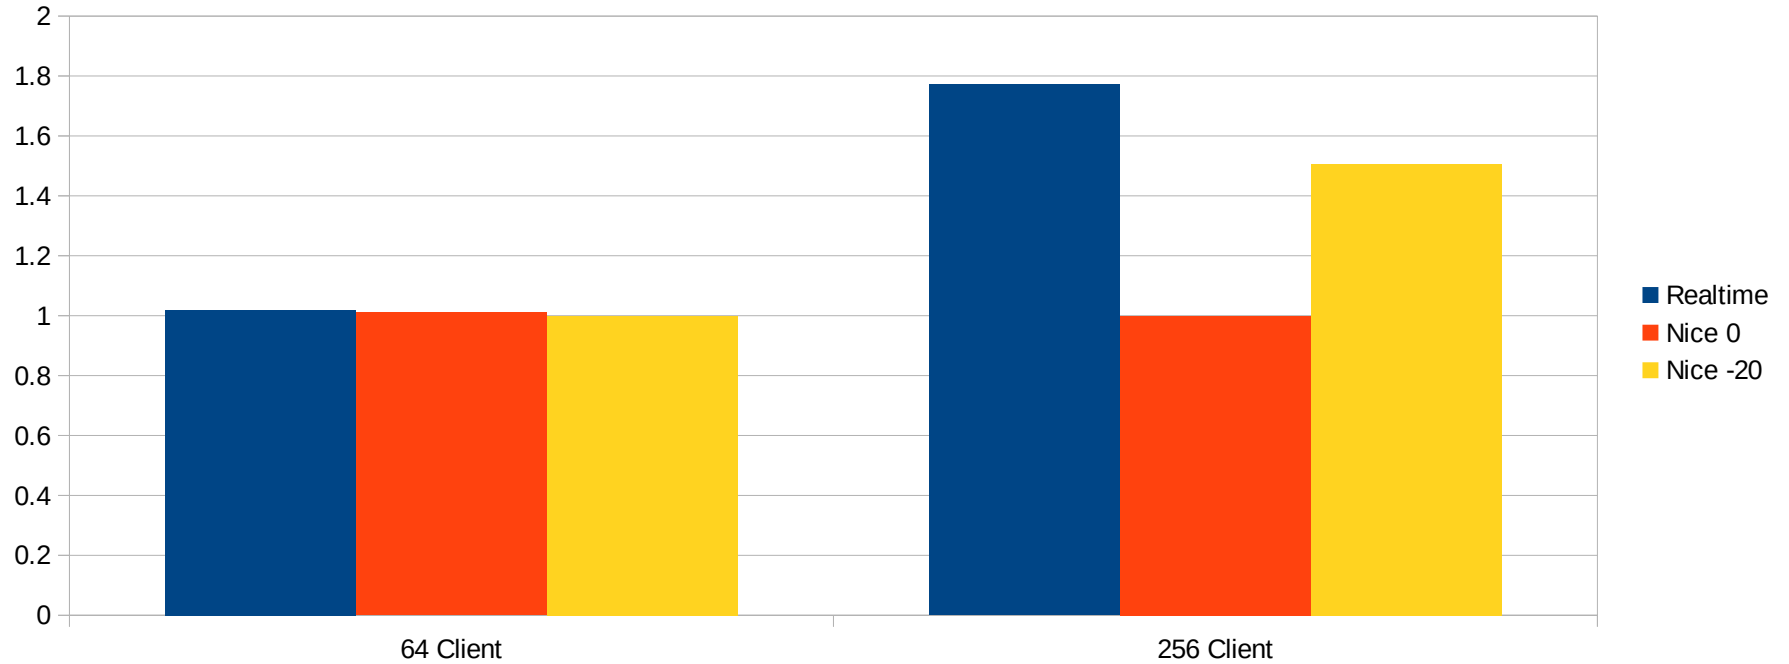

Prakash Sangappa, Dhaval Giani
Oracle

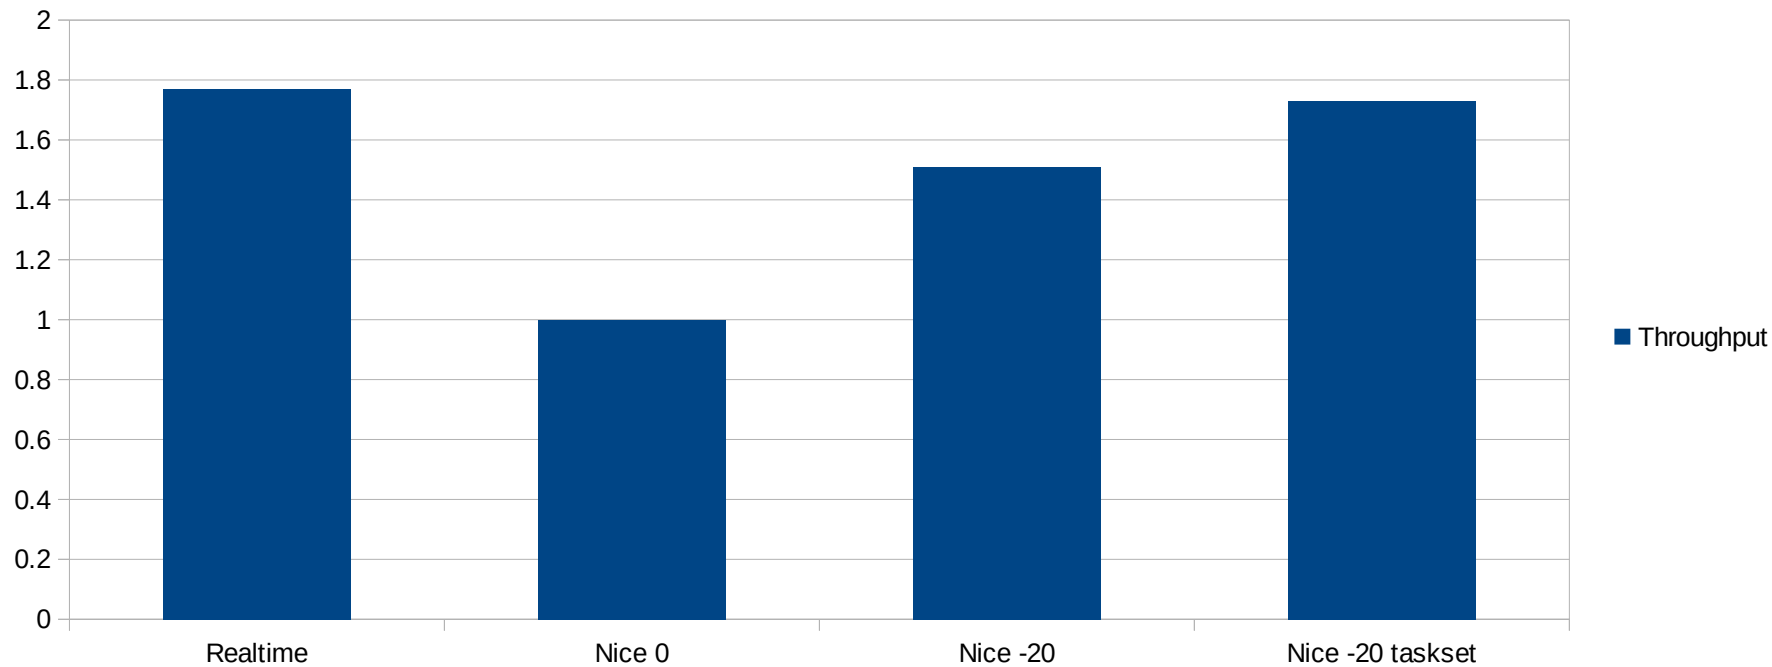

Tests - Compare RT vs -ve Nice

- 68 Thread VM
- Cluster DB setup with 4 critical process per node.
- Runs with 64 and 256 client connections(running locally)
- Spawn a server process per client connection
- Run critical processes at RT vs CFS -20
- Taskset to isolate critical processes to CPU 0-3

Throughput

256 Clients

Migrations
